

RACKS

SINGLE & DOUBLE

Perhaps the most ruggedly built Racks on the market today, few companies build them like we do. Both the Single and Double Racks are made with Heavy Gauge Aluminum and Heavy Duty casters.

With Riveted construction, all angles and frame are spot fused together. This greatly reduces frame flex and sway when the racks are supporting heavy loads. The casters are another area we were concerned with. All casters were researched to ascertain which would provide best mobility and longevity under constant heavy weight.

Custom Racks for different size pans or boards available upon request. Extra Heavy Duty Reinforced Racks available upon request.
