

# SINGLE BAGEL DIVIDER FORMER

## CG/DF 4000

With the recent proliferation of small retail Bagel outlets and rising metropolitan retail space costs, a need for a smaller Bagel production unit was evident. Alas, that unit is finally here. A unit which couples our rugged Bagel Divider with our durable Single Bagel Machine.

It's space saving design enables this unit to be utilized within outlets that desire fresh production for it's clientele, while eliminating the need for expansion to house this machine. Other than it's space saving attribute, this unit is quite similar to our its larger counterpart. Durability and product quality are the prime objectives. The body is constructed of durable stainless steel, as are all components that come into contact with dough, other than the belt. This ensures hygienic conditions as well as ease of cleaning.

With the option of a variable speed drive, this unit is quite possibly the most versatile and user friendly bagel machine available. Need bagels in a hurry? No problem, just dial-in the desired speed. The CG/DF 4000 can produce a conservative 3,600 consistent bagels per hour. An amazing feat for such a small unit.

To accommodate different bagel sizes, such as mini or jumbo, simply change the belt, housing and mandrill. Executed properly, this change takes only minutes to complete!

Made with pride
